complexType NonSeriousAdverseEvent

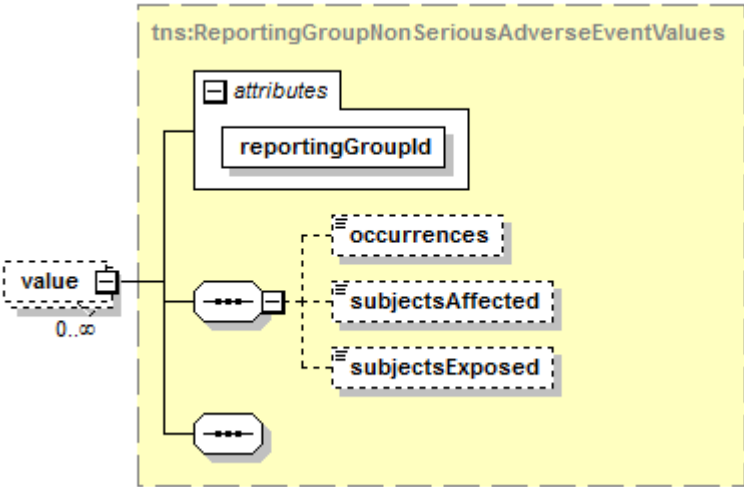

diagram	<p>The diagram illustrates the structure of the NonSeriousAdverseEvent complex type. It is an extension of the tns:AdverseEvent type. The extension includes the following elements:</p> <ul style="list-style-type: none"> description: A text element. term: A text element. organSystem: A text element, marked as optional (+). assessmentMethod: A text element, marked as optional (+). A note indicates: "See EUTCT list 'Medical Dictionary For Regulatory Activities (MedDRA)'". dictionaryOverridden: A text element. dictionary: A text element, marked as optional (+). A note indicates: "If the question 'Do you want to use a different dictionary name and version or reporting this adverse event?' is answered 'No', then the alternative dictionary name, alternative dictionary version and other dictionary name must not be provided." values: A sequence of tns:ReportingGroupNonSeriousAdverseEventValues elements, marked as optional (+).
