EudraCT v9.1.2 Release Notes

For public, secure, and business

EudraCT Main version: 9.1.0.0

EudraCT Results version: 9.1.2.2

Goal: Patch release

Release Date: 12/12/2013

Release Notes for EudraCT v9.1.2 Public

The following new functionality has now been added to EudraCT v9.1.2:

- Result users: XML upload of clinical trial results (beta version). For instructions and supporting technical documentation please check the "Documentation" page of the EudraCT web site. (<https://eudract.ema.europa.eu/document.html>)
- New validation rules to check the validity of full range, interquartile range and confidence intervals.
- New validation rules to check the subject numbers in the pre-assignment period are consistent.

Issues fixed since the last release (v9.0.1)

The following problems have been fixed since the last release:

- When the user of the Results module attaches several summary files to the result, in certain cases an error message is displayed. If this happens, the user is advised to go back and to repeat the attachment procedure.
- There are a few tool tips missing or misplaced within the Results module.

Known issues in release v9.1.2

- XML Upload: Unable to upload a result XML successfully if the Sponsor Organisation Name is blank and every other field have been completed.
- It may take several seconds for EudraCT to switch from the Results module to the Clinical Trial Application module. This delay is observable for the first time only, subsequent switches are quick.
- Age continuous list of units is not standardised with EUTCT.
- Some of the graphical elements are misplaced in certain screen resolutions in the CTA module due to the refreshed appearance in v9.0.0.
